CloudShare for LMS:

Streamline Your Training with Hands-On Practice

Reduce drop-off by 45% and boost student participation by 53% with real-world scenario training, directly from your LMS!

Purpose-built for a seamless, hands-on experience, CloudShare integrates directly with your existing LMS and improves training in ways traditional solutions simply can't accomplish.

Zero-code. No overhead. Immediate results.

How CloudShare Complements Your LMS

Streamlined User Experience

Keep all communications in one place.
Launch programs directly from your LMS, without the need to toggle between systems.

Better Training Content

Allow trainers to focus on creating content and courses rather than setting up training environments. Ensure content is always available by storing it in a secure cloud environment.

More Efficient Administration

Sync duplicate information and invite trainees through your LMS automatically. Manage all courses and users from a single dashboard.

Scale Up and Down, Easy

Allow instructors to manage more training without increasing staff headcount. Easily spin up new training environments in minutes to include more trainees.

Support Revenue Growth

Leverage new opportunities by adding virtual training practice to your portfolio. Track and allocate costs through project management tools & dashboards for more effective spending.
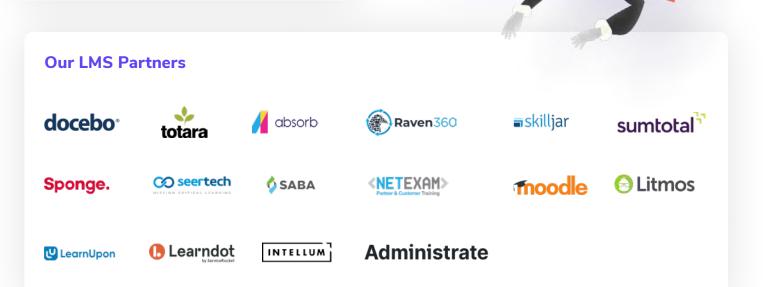

Empower and Engage Your Users

Make your content come to life with hands-on practice in real-world scenarios. Engage your students through dedicated in-app communication features, and gain real-time insights on student engagement throughout the class.

Easy Implementation

With LTI integration available for most LMS providers, integrating CloudShare with your LMS is simple and easy. Removing the need for any coding and hassle so you can focus on delivering impactful training.
