

Turn your software into your **sales star**

CloudShare's virtual IT labs solution lets you quickly spin up **cloud-based environments** for POCs and demos, that are wonderfully collaborative and totally hands-on.

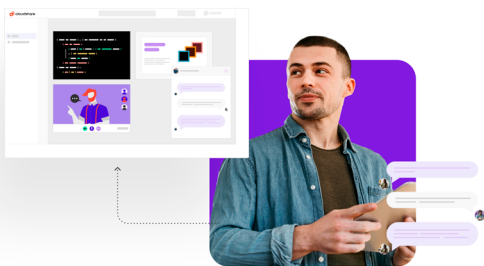

Give your prospects a full-throttle test drive (and not just a quick spin)

CloudShare helps you showcase the full power of your product, lifting buyer engagement and increasing conversion:

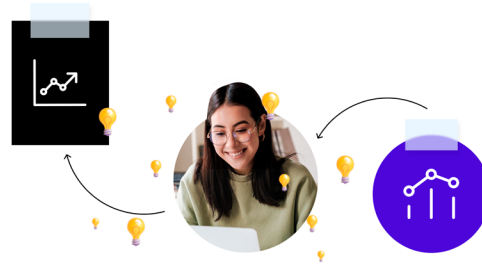

- Hand your prospects the wheel with fully-functioning software replicas that give them a "play and break" experience.
- Spin up demos and POCs in literally minutes. (No coding, DevOps, or IT needed. *For real.*)
- Optimize ROI by suspending environments when not in use, ensuring you only pay for what you need.

Drive sales with deeper product understanding

Speed up your sales cycle with seamless collaboration tools like over-the-shoulder demos, Slack integration, and chat.

Keep prospects engaged with powerful analytics that let you monitor engagement and usage in real-time so you know what to optimize and when to follow-up.

We've got the receipts.... 🙇

We're talking 4x higher buyer engagement during demos, shorter sales cycles, and more closed deals.

“

I can quickly provide demos and training to customers. It's much faster and scalable than configuring systems on site.

Keep your RevOps team happy

Prevent budget blowout with policy automation: Suspend or delete inactive environments, set specific user permissions, and remove unnecessary resources.

Accessible anytime from anywhere

Give prospects the freedom to dig into your POCS wherever and whenever - all they need is an internet connection!

Scale your success

Create, reuse, and customize blueprints and templates to run multiple POCs and demos simultaneously.
