CloudShare Virtual IT Labs

Highly Customized Hands-On Training from Anywhere

CloudShare provides the industry's most comprehensive solution for control and management of all your virtual IT training in the cloud. Create the ideal learning environment for your specific software solution, spun up in minutes with our step by step wizard, and facilitating superb performance on-demand, anywhere in the world. And you can connect it with any LMS.

Why Virtual labs

Virtual labs add flexibility and control to software training, increasing participation and engagement levels by overcoming the limitations of distance learning or physical classrooms.

Instructor-Led Training

Engaging virtual classes for an unlimited number of students.

Self-Paced Training

Study at your own speed -- anytime, anywhere.

Technical Certification

Utilize virtual labs for certification and accreditation.

Events

Fully-scalable training solutions for global virtual conferences with hands-on sessions.

Easily Replicate a Real World Training Environment

Build a true replica of your production environment complete with network configuration on the cloud, ideal for SaaS training or hybrid solutions. No re-architecture needed.

Automatic handling of each aspect of cloud environment configuration for a class, from setup to teardown.

Wizard-based environment creation, with VM import capabilities for your existing machines, as well as a vast out-of-the-box template library.

Include virtual appliances such as network switches, firewalls or ports, as well as utilizing native nested virtualization.
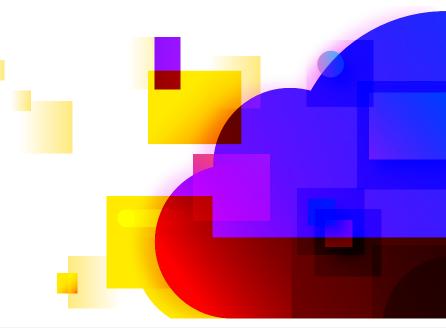

Build classes once and save their environments as templates, creating blueprints for instant reuse or customization.

Custom invitations prompt students to instantly launch completely isolated environments in their web browser. No downloads, plugins, or added software.

Classes can be scaled to any number of students, backed by the power and flexibility of worldwide data centers, including commodity clouds.

Deliver Instant Training on Top of the Public Cloud

Spin up your environment on the public cloud directly from CloudShare, and get the might of the cloud alongside the flexibility and control of the industry's most advanced virtual labs solution.

Provide transparent access to the leading commodity Clouds, AWS, Azure and GCP.

Facilitate cross-platform hybrid cloud training from a single screen, with an easy to use browser-tab format.

Easy out-of-the-box integration, such as access to the AWS console, Azure portal, or GCP admin console, directly from CloudShare platform.
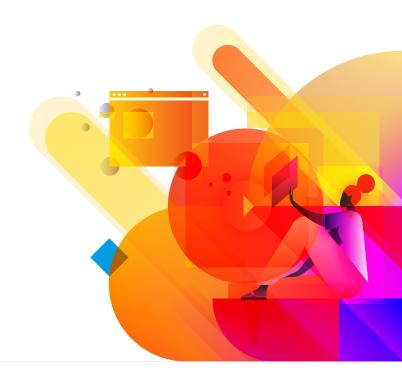

Students access your lab from anywhere in the world, regardless of geographical location.

Tightly manage usage, including both machine and user controls to keep cloud costs to a minimum.

Automatically stay up to date with cloud provider changes or updates.

Create Feature-Rich Virtual Labs

Think total personalization. Each instructor has full control over the student lab experience, tightly structured to suit individual requirements.

Conduct as many classes as you need simultaneously, each with their own unique requirements.

Customize, localize and brand your virtual labs, making them your own.

Easily reuse existing class templates and content, modify or add new content and resources.

Embed a wide variety of interactive content, from images and videos to URLs and more.

Multi-step class option supports different environments tailored for progressive steps in a single course — all configured and accessed within the same class.

Students enjoy the most intuitive multi-language virtual environment viewer available, with the widest selection of UI features in the industry.

Utilize Instructor-Led or Self-Paced Solutions

Comprehensive, yet simple-to-configure solutions for a wide variety of training use cases, both instructor-led, or to facilitate self-paced learning.

Free up staff from tedious administrative tasks, enabling them to concentrate on preparing outstanding courses and best supporting students.

Allow an instructor to monitor each student's performance and participation in real time with live thumbnails of each environment.
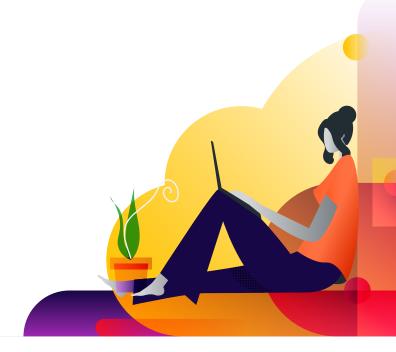

Advanced instructor controls include over-the-shoulder zoom-in, chat, take control, and the ability to share or broadcast a specific screen.

A simple email address and passphrase combination gives the student access to both the instructor-led classroom, and unlocks individual, unaided self-paced learning.

Students can learn on their own schedules. The environment will be automatically torn down after a pre-set amount of time.

A Secure and Cost-Effective Training Solution

Control costs with intelligent usage tracking, and automatic suspend and delete capabilities, removing resources and environments when they're not in use.

Each student receives an isolated, on-demand sandbox environment, with no access to the rest of the network, and total work privacy from the rest of the class.

Reduce direct costs by automating course administration processes — from sending invitations, to tracking responses, to measuring work performed.

Eliminate redundant tasks and save time with automatic user and environment provisioning at any scale.

Easily integrate with other training productivity tools and LMS, using robust APIs and the CloudShare pre-built Zapier interface.

Built-in dashboards and analytics make it easy to understand environment usage, track costs per class and compare class-to-class performance.

Prevent delays with full connectivity testing and automatic screen resolution adjustment before a class.

About CloudShare

The world's easiest-to-use virtual labs for software training, sales demos and POCs

CloudShare advanced lab solutions were built to accelerate business growth. Think demos that convert, POCs that prove value, training that leads to retention, and testing and development that perfectly mimic real-world environments. Make it your own, by customizing exactly what you need across servers, networking, storage and software. Easy to set up, automatic to tear down, on-demand, and available anywhere you have an internet connection - CloudShare virtual labs add value right out of the box.
